①

Hairs & fibers found in:

- ① All smooth
2. Wooling (fibers found are of no value).
3. Tape (plastic, devices & covering up) on adhesive side from expert trapping devices in auto departments

Can compare dog & cat hairs if the coat is removed.

4. Weapons (hemp, cloth)
5. Glass & a crime scene.
6. Contact case (cigarette green Vic. & Sud.)
7. Auto transfers (from rug to car/seat).

Testimony

We know ~~whose~~ hair of ~~the~~ ~~dead~~ ~~dead~~ ~~was taken~~ ~~was taken~~ from the dress but was consistent in the microscopic characteristics to those of our hairs; accordingly, could have the same origin.

\* "Ques statement" — "always includes" It is pointed out that these comparisons do not constitute a basis for positive personal identification.

typical  
characteristics/  
marked for exclusion of hairs

2. Can't conclude source (e.g.)
3. Can exclude source — ~~part of~~ ~~part of~~

Replies in my experience, have usually been hairs from dogs: people exhibiting ~~the~~ ~~same~~ microscopic characteristics.
